

```
graph BT; RcCpp[src/Rc.cpp] --> RcCppH[src/Rc.cpp.h]; RcCppExample[src/Rc.cppExample.cpp] --> RcCppH
```

src/Rc.cpp.h

The diagram illustrates a dependency structure where two source files, `src/Rc.cpp` and `src/Rc.cppExample.cpp`, both depend on the header file `src/Rc.cpp.h`. The header file is represented by a gray box at the top, while the source files are in white boxes at the bottom. Blue arrows point from each source file box to the header box, indicating the direction of the dependency.
