

# Package ‘baystability’

October 12, 2022

**Type** Package

**Title** Bayesian Stability Analysis of Genotype by Environment Interaction (GEI)

**Version** 0.1.0

**Maintainer** Muhammad Yaseen <myaseen208@gmail.com>

**Description** Performs general Bayesian estimation method of linear–bilinear models for genotype  $\times$  environment interaction. The method is explained in Perez-Elizalde, S., Jarquin, D., and Crossa, J. (2011) (<[doi:10.1007/s13253-011-0063-9](https://doi.org/10.1007/s13253-011-0063-9)>).

**Depends** R ( $\geq$  3.1)

**Imports** dplyr, ggplot2, ggfortify, lme4, magrittr, MASS, matrixStats, reshape2, rstiefel, rlang, scales, stats, tibble, tidyverse

**License** GPL-2

**Encoding** UTF-8

**LazyData** true

**RoxygenNote** 6.0.1

**NeedsCompilation** no

**Author** Muhammad Yaseen [aut, cre],  
Diego Jarquin [aut, ctb],  
Sergio Perez-Elizalde [aut, ctb],  
Juan Burgueño [aut, ctb],  
Jose Crossa [aut, ctb]

**Repository** CRAN

**Date/Publication** 2018-03-13 15:55:34 UTC

**bayes\_ammi***Bayesian Estimation of Genotype by Environment Interaction Model*

---

**Description**

Bayesian estimation method of linear–bilinear models for Genotype by Environment Interaction Model

**Usage**

```
## Default S3 method:
bayes_ammi(.data, .y, .gen, .env, .rep, .nIter)
```

**Arguments**

.data	data.frame
.y	Response Variable
.gen	Genotypes Factor
.env	Environment Factor
.rep	Replication Factor
.nIter	Number of Iterations

**Value**

Genotype by Environment Interaction Model

**Author(s)**

## Description

cultivo2008 is used for performing Genotypes by Environment Interaction (GEI) Analysis.

## Usage

```
data(cultivo2008)
```

## Format

A `data.frame` 1320 obs. of 6 variables.

## Details

- Gen Genotype
- Institute Institute
- Rep Replicate
- Block Block
- Env Environment
- Yield Yield Response

```
data(cultivo2009)
```

---

e\_eff

*Environment Effects*

---

## Description

Calcuates Environment Effects

## Usage

```
## Default S3 method:  
e_eff(.data, .y, .gen, .env)
```

## Arguments

.data	data.frame
.y	Response Variable
.gen	Genotypes Factor
.env	Environment Factor

## Value

Environment Effects

## Author(s)

1. Muhammad Yaseen (<myaseen208@gmail.com>)

## References

## Examples

```
data(cultivo2008)  
e_eff(  
  .data = cultivo2008  
  , .y = y  
  , .gen = entry  
  , .env = site  
)
```

ge\_ammi

*AMMI of Genotype by Environment Interaction Model***Description**

Performs Additive Main Effects and Multiplication Interaction Analysis of Genotype by Environment Interaction Model

**Usage**

```
ge_ammi(.data, .y, .gen, .env, .rep)

## Default S3 method:
ge_ammi(.data, .y, .gen, .env, .rep)
```

**Arguments**

.data	data.frame
.y	Response Variable
.gen	Genotypes Factor
.env	Environment Factor
.rep	Replication Factor

**Value**

Genotype by Environment Interaction Model

**Author(s)**

1. Muhammad Yaseen (<myaseen208@gmail.com>)

)
```

matrix_k	<i>k Matrix</i>
----------	-----------------

## Description

Gives k matrix

## Usage

```
matrix_k(n)

## Default S3 method:
matrix_k(n)
```

## Arguments

n                  Number of columns

## Value

Matrix

## Author(s)

1. Muhammad Yaseen (<[myaseen208@gmail.com](mailto:myaseen208@gmail.com)>)

## References

---

orthnorm	<i>Orthogonal Normalization</i>
----------	---------------------------------

---

## Description

Perform Orthogonal Normalization of a matrix

## Usage

```
orthnorm(u = NULL, basis = TRUE, norm = TRUE)

## Default S3 method:
orthnorm(u = NULL, basis = TRUE, norm = TRUE)
```

## Arguments

u	Matrix
basis	Logical argument by default TRUE
norm	Logical argument by default TRUE

## Value

Matrix

## Author(s)

1. Muhammad Yaseen (<myaseen208@gmail.com>)
