

NAME

`jadetex` – processing tex files produced by the T_EX backend of Jade.

SYNOPSIS

jadetex [first line]

DESCRIPTION

This manual page was derived from the manual page for L^AT_EX and is not meant to be exhaustive. The complete documentation for this version of T_EX can be found in the info file or manual *Web2C: A TeX implementation*.

JadeT_EX is a T_EX macro package, not a modification to the T_EX source program, so all the capabilities described in **tex**(1) are present. **pdfjadetex** is the PDFT_EX version of the jadeT_EX format.

SEE ALSO

pdfjadetex(1), **latex**(1), **tex**(1),

AUTHORS

The author of jadeT_EX is Sebastian Rahtz.

This manual page was derived from the L^AT_EX manual page. It is provided for the Debian distribution by Marcus Brinkmann. Please send improvements, suggestion and other comments to brinkmd@debian.org.
